EXPERIENCE

Senior Program Manager, Developer Experience & Platform Compute

Microsoft | Atlanta, Georgia | Sep 2024 - Present

- Directed vulnerability remediation across 100+ cloud services, delivering zero PCI and FedRAMP audit findings in H1 2025 and a 10-month SLA-compliance streak.
- Closed ownership gaps to reach 100% service attribution, integrating inventory data so engineering teams received precise, actionable findings.
- Productized AI-assisted compliance reporting with deterministic KQL and auditable workflows, cutting recurring effort ~70% (~16.7 person-days monthly).
- Automated ~80% of incident creation and ~90% of daily SLA reporting; cut projected incidents 35.8% (106 to 68) with 100% coverage accuracy.
- Compressed remediation cycle time from 24 to 7 days by consolidating 44 service namespaces into 8 repository work items.
- Shipped AI-assisted remediation guidance into an enterprise engineering assistant, generating fix instructions and code changes under Responsible AI controls.
- Led recovery after deployment and identity setbacks via a 129-incident post-mortem, adding image validation, monitoring, alerting and escalation.

Product / Program Manager, Developer Experience & Platform Compute

Microsoft | Tallinn, Estonia | Mar 2021 - Aug 2024

- Owned product vision, roadmap and SDLC for developer-platform compliance and modernization products across two major Microsoft engineering organizations, using Semantic Kernel and Azure OpenAI.
- Delivered four DORA reliability metrics for 497 services to 180 owners monthly, equipping leaders to improve developer experience.
- Grew modernization-platform adoption 82% in users and 165% in usage in a single half-year through UX and targeted engineering campaigns.
- Converged compliance reporting to present 100% of a major workload's releases and build data in one audit experience, retiring duplicated tooling.
- Productized automated audit-evidence gathering into a reusable platform capability, reducing toil across SOC, PCI and FedRAMP audits.
- Reduced new-service onboarding effort 16-22% and reached 100% base-image attribution by removing five duplicative tasks per service.

Product Manager, MEA / Regional Expansion

Wise | Tallinn, Estonia | Dec 2019 - Jan 2021

- Led a cross-functional team expanding the Wise product portfolio across the Middle East and Africa.
- Launched Wise Send Money in the UAE, enabled by securing an Abu Dhabi (ADGM) Money Services license.
- Delivered Turkey instant transfers and IBAN receive, plus payouts to Uganda, Tanzania, Ghana and West Africa.

Product Manager, Bloom / Retail Pharmacies

mPharma | Accra, Ghana | Sep 2016 - Nov 2019

- Defined and executed the product vision for Bloom, deployed to 60+ independent pharmacies across 5+ African countries.
- Established an agile delivery model across three development hubs.
- Delivered inventory capabilities that reduced stock-outs by nearly 50% across network pharmacies.

MY PHILOSOPHY

I turn complex security obligations into trusted products, auditable automation and better developer experiences.

MOST PROUD OF

Automating trusted cloud operations

Cutting reporting effort ~70%, automating 80% of incident creation and delivering zero PCI and FedRAMP vulnerability audit findings in H1 2025.

Multiplying talent and market impact

Mentoring six early-career colleagues with a 75% return outcome while launching fintech and health-tech products across global markets.

EDUCATION

EMBA, Entrepreneurship Management

University of Ghana

 Ghana | Aug 2017 - Nov 2020

Specializations: Marketing, Product Strategy, Business Acceleration, Customer Definition

Executive Education

MIT Sloan School of Management

 Cambridge, MA, USA | Jan 2018

Specializations: Implementing Enterprise-wide Transformation

Executive Education

Yale School of Management

 New Haven, CT, USA | Jan 2018

Certificate in Software Entrepreneurship

MEST Africa

 Accra, Ghana | 2009 - 2011

Specializations: Business Growth, Strategy, Product Management, SDLC, Java, JQuery, SQL, HTML, CSS

Bachelor of Science, Biochemistry

University of Ghana

 Accra, Ghana | 2005 - 2009

Specializations: Molecular Biology & Thin Layer Chromatography

EXPERIENCE, CONTINUED

Software Engineer, Front-End / User Experience

GenKey | Accra, Ghana | Jan 2014 - Sep 2016

- Led front-end engineering and user experience for voter registration and management solutions used in African elections.
- Designed and implemented the interface for an ML-powered de-duplication solution in high-stakes public-sector deployments.
- Connected field workflows, user needs and engineering constraints to improve usability and operational execution.

Co-founder, Product Designer / Implementation Lead

ClaimSync | Accra, Ghana | Jun 2011 - Jan 2014

- Co-founded and built an electronic medical record and automated insurance-claims platform later acquired by GenKey.
- Led product design and implementation of claims automation that helped reduce fraud by 20%.
- Built founder-level experience across customer discovery, product delivery, implementation and regulated operations.

ROLE RELEVANCE

Enterprise product and program leadership across AI-enabled compliance, developer platforms and regulated cloud operations.

LEADERSHIP CAPABILITIES

Program and portfolio execution

Roadmaps, governance, cross-team dependencies, SLA management and executive communication.

Security and compliance by design

Vulnerability remediation, audit evidence, FedRAMP controls and sovereign-cloud governance.

AI-enabled operational leverage

Agentic AI, Model Context Protocols, robotic process automation, Semantic Kernel and Azure OpenAI.

LEADERSHIP & MENTORSHIP

A leader, director and mentor in every role — setting strategy and standards while staying hands-on and directly accountable for shipping features.

- Directed cross-team vulnerability remediation across 100+ cloud services while personally owning the automation, dashboards and incident workflows that made it self-sustaining.
- Trusted by leadership as the source of truth for remediation, driving a daily operating cadence and time-to-green visibility across partner teams.
- Mentored six early-career PMs and engineers to a 75% return outcome through project matching, coaching and actionable feedback.
- Led AI, compliance and automation learning sessions and coached product communities through webinars and ask-me-anything forums.
- Organized a 200+ participant company hackathon spanning 11 divisions and 14 countries.
- Co-founded and directed an electronic medical-record and claims platform, owning product design and implementation end-to-end.
- Converted post-mortems and root-cause analyses into earlier escalation, health checks and resilient operating mechanisms.

WHERE I EXCEL

AI-enabled compliance automation

Productize deterministic agents and workflows that reduce toil while preserving auditability.

- Reduced recurring reporting effort ~70%
- Automated ~80% of incident creation

Cloud security program leadership

Coordinate vulnerability remediation across complex public, sovereign and government estates.

- Zero PCI & FedRAMP audit findings, H1 2025
- Sustained a 10-month SLA-compliance streak

Data-driven operating mechanisms

Turn telemetry into ownership, dashboards, SLA forecasts and decisive action.

- Predictive time-to-green KQL dashboards
- Cut projected incidents 35.8% (106→68)

Cross-organizational alignment

Unite engineering, security, compliance and customer teams around measurable outcomes.

- 100% service-ownership attribution
- Aligned four partner engineering teams

Global product & founder execution

Launch regulated fintech products into new countries across enterprise, scale-up and startup contexts.

- Launched Wise Send Money in the UAE via ADGM license
- Payouts to Turkey, Uganda, Tanzania, Ghana & W. Africa
